

Malik Zhang

Product Designer

Product Designer bridging HCI and Industrial Design, shipping products since 2021. Turns dense, technical data into interfaces people can act on in seconds, prototyping in code to build alongside engineers and researchers.

EXPERIENCE

NeuraLyfe

Mar 2026 · Seattle, WA

Product Designer · FigBuild 2026 · 1st Place of 690 Teams · \$10K Grand Prize

Designed an AI-enabled neurotechnology decision-support system that translates helmet impact data into real-time neurological risk insights for sideline medical staff.

- Structured the diagnosis flow into three progressive views so non-specialist staff can act within seconds
- Prototyped real-time risk monitoring in Figma Make, pairing live sensor data with AI-generated summaries
- Encoded neurological metrics into visual signals and alert states readable at a glance

Spatial Editor

Jan 2026 – Present · Seattle, WA

Product Designer · Capstone Project · New Paradigm for XR Text Input

Designed a new interaction paradigm for text input in XR, rethinking current high-friction methods through faster, multimodal alternatives.

- Defined the problem space, identifying text input as XR's highest-friction task through a competitive teardown of 2 input methods
- Observed 8 Vision Pro and Quest users and ran interviews to map real-world friction patterns
- Prototyped 2 interaction concepts in Xcode, converging on a multimodal model that pairs predictive AI with gaze-led targeting
- Validated the model with 10 users in usability testing

Moti: Plan · Oryne

2025 – Present · Seattle, WA

Product Designer + iOS Developer · Two iOS Apps Shipped Solo to the App Store

Designed and built Moti, an AI-native planning tool, and Oryne, an inspiration-capture app built on frictionless, category-free thought capture.

- Owned end-to-end design and build in SwiftUI and SwiftData, using on-device Apple Intelligence to organize captured thoughts privately, without cloud processing
- Localized end-to-end for the Chinese market with a 257-key, human-reviewed Simplified Chinese localization

Aura

Sep 2025 – Dec 2025 · Seattle, WA

Product + ID · Motion Sickness Relief System

Designed a sensor-driven wearable that reduces motion sickness through anticipatory sensory feedback, intervening before symptoms onset.

- Reframed relief from reactive treatment to anticipatory care, using real-time HRV data to detect early autonomic stress before discomfort begins
- Designed the sensing-to-feedback loop, triggering 100 Hz sound stimulation grounded in published vestibular research on motion sickness
- Defined the wearable form factor for inflight use, balancing sensor placement against long-haul wear comfort

WORK

UW MHCI+D

Sep 2025 – Present · Seattle, WA

Technology and Equipment Manager

- Designed an online inventory system to streamline access to equipment
- Supported prototyping and equipment access for student design work
- Maintained studio technology operations for project development

IKEA

Mar 2025 – Aug 2025 · Hangzhou, China

UX Designer Intern

- Contributed to interaction design for retail and service experiences, supporting accessible, user-centered solutions
- Supported research and concept development with cross-functional partners

Focused Photonics Inc.

Jun 2024 – Sep 2024 · Hangzhou, China

Product Designer Intern

- Contributed to form and interaction design for monitoring devices
- Translated technical requirements into usable product concepts

EDUCATION

University of Washington

Master of Human

Computer Interaction
+ Design

2025 – 2026 · Seattle, WA

Zhejiang University of Technology

B.E., Industrial Design

2021 – 2025 · Hangzhou, China

SKILLS

Strategy

Problem Framing
Product Strategy
Opportunity Mapping
Design Principles
Trade-off Analysis
Storytelling, Critique
Stakeholder Alignment

Design
